

Welcome to participate in the Conference www.icppmh2010.se

Remember the
**3rd International Congress - Physiotherapy in Psychiatry
and Mental Health (icppmh)**

Lund, Sweden 3-5 February 2010

. The theme of the conference is
‘Professional Development- integrating theory and practice’

Help to form the conference by submitting your abstract (workshop, poster presentation, special interest report or research report) no later than September 15th 2009. Of course we also welcome you as a participant in the conference!

The conference will update our knowledge about research and clinical practice as well as deepen our knowledge about the practice within the area. How to integrate Physiotherapy in Psychiatry and Mental Health into the educational curriculum in different countries, on different academic levels is also an important question. To create global networks both formal and informal have as usual also a high priority.

We hope that you can join us at this fantastic conference and listen to our best speakers and participate in the interesting workshops! www.icppmh2010.se
